OBJECTIVE

CompTIA Security+ certified IT graduate majoring network security proficient in network IDS/IPS setup, firewall rules configuration, and SIEM management (Splunk), seeking to leverage my skills at Advance Computing.

EXPERIENCE

IT Support Engineer Intern
GoClickOn | Melbourne | Jul 2024-Nov 2024
- Update DNS records for migration of webmail data into Google Workspace
- Assist in overlooking TrendMicro endpoint security for abnormalities
- Administered Azure Active Directory and Google Workspace accounts
- Update the network with new access point setup
- Conduct regular asset list evaluation and update records
- Perform troubleshooting tasks such as password reset, driver issue

Customer Service
Masada Private Hospital | Balaclava | Aug 2023 - Present
- Resolve customer issues and inquiries remotely and in-person
- Manage team to ensure daily tasks are performed in effective manner

PROJECTS

- Personal portfolio website: https://bilnishan.github.io/
- Utilized Burp-Suite and Nessus to assess the vulnerabilities in the network and Metasploit to perform penetration against the network in the HTB platform
- Designed and implemented a network infrastructure (Capstone), including the setup of routers, switches, firewalls, and DMZ zones and configured Firewall, IDS and IPS rules to detect and mitigate unauthorized traffic from network
